No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Description

US-08-300-025-14

Sequence 14, Application US/08303025

Sequence 14, Application US/08303025

Patent No. Sci4494

GENERAL INFORMATION:

APPLICANT: Warkefield, Thomas W.
APPLICANT: Stanley, James C.

TITLE OF INVENTION: NOVEL PEPTIDES FOR HEPARIN AND TITLE OF INVENTION: LOW MOLECCULAR WEIGHT HEPARIN TITLE OF INVENTION: ANTICOAGULATION REVERSAL NUMBER OF SEQUENCES: 16

CORRESPONDED ADDRESS:
ADDRESSEE: Benita J, Rohm, Esq.
STREET: 150 West Jefferson, Suite 2500

CITY: Berroit States of America COMPUTRY: United States of America COMPUTRY: INDICASELE FORM:
MEDIUM TYPE: Floppy diskette 3.5" 1.44MD

COMPUTRY: Noriderical Scales of America COMPUTRY: WordPerfect 6.1; ASCII (DOS)Text

CLASSIFICATION NUMBER: US 08/152,488

FILING DATE: 13-NOV-1993

ATTORNEY REPERENCE/DOCKET NUMBER: TWH-060548-00231

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Description

JETHIE OF INVENTION: NUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO PSEUDOMONAS

TITLE OF INVENTION: ARENGINOSA FOR DIAGNOSTICS AND THERAPEUTICS

FILE REFERENCE: 107196 136

CURRENT APPLICATION NUMBER: US/09/252,991A

CURRENT FILING DATE: 1998-02-18

PRIOR APPLICATION NUMBER: US 60/074,788

PRIOR FILING DATE: 1998-02-18

PRIOR FILING DATE: 1998-07-27

NUMBER OF SEQ ID NOS: 33142

LENGTH: 407
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Sequence 27, Application US/09041889

Sequence 14, Application US/08995172B

Patent No. 621812

GENERAL INFORMATION:

APPLICANT: Thatcher, David R

APPLICANT: Wilks, Paula B

TITLE OF INVENTION: Optimization of Gene Delivery and Gene Delivery Systems

FILE REFERENCE: CACO0026

CURRENT APPLICATION NUMBER: US/08/995,172B

CURRENT PILING DATE: 1997-12-22

EARLIER FILING DATE: 1997-12-22

EARLIER FILING DATE: 1997-12-23

NUMBER OF SEQ ID NOS: 25

SOFTWARE: Patentin Ver. 2.1

SEQ ID NO 14

FEARLIER PILING OF SEG ID NOS: 26

| Sequence 21, Application US/08995172B
| Patent No. 621812
| GENERAL INFORMATION:
| APPLICANT: Thatcher, David R
| APPLICANT: Wilks, Paula E
| TILLE OF INVENTION: Optimization of Gene Delivery and Gene Delivery Systems
| TILLE OF INVENTION: Optimization of Gene Delivery and Gene Delivery Systems
| TILLE OF INVENTION: Optimization of Gene Delivery and Gene Delivery Systems
| CURRENT APPLICATION NUMBER: US/08/995,172B
| CURRENT FILING DATE: 199-12-22
| BARLIER FILING DATE: 1996-12-23
| NUMBER OF SEQ ID NOS: 25

i Sequence 4, Application US/09410399

i Patent No. 6482587

j General INFORMATION:
CENERAL INFORMATION:
APPLICANT: Robertson, Erle S.
APPLICANT: Cotter, Murray A.
TITLE OF INVENTION: Methods to Inhibit or Enhance the Binding of Viral DNA
TITLE OF INVENTION: to Genomic Host DNA
TITLE OF INVENTION: to Genomic Host DNA
TITLE OF INVENTION: to Genomic Host DNA
CURRENT APPLICATION NUMBER: US/09/410,399
CURRENT FILING DATE: 1999-10-01
NUMBER OF SEQ ID NOS: 6
SOFTWARE: PatentIN Ver. 2.0
SEQ ID NO 4
IENGTH: 641

TYPE: PRT

Patent No. 5534619
GENERAL INFORMATION:
APPLICANT: Makefield, Thomas W.
APPLICANT: Andrews, Philip C.
APPLICANT: Stanley, James C.
TITLE OF INVEXTION: NOVEL PEPTIDES FOR HEPARIN AND TITLE OF INVEXTION: LOW MOLECULAR WEIGHT HEPARIN;
TITLE DE INVEXTION: ANTICOAGULATION REVERSAL
NUMBER OF SEQUENCES: 13
CORRESPONDENCE ADDRESS:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               CCMPUTER READBLE FORM:
